AGB Tilt/Slide Patio Door Hardware

Open, Close, Live

AGB Galileo CM Tilt/Slide Patio Hardware

Galileo CM is the top quality hardware system for tilt/slide patio doors from our Italian hardware partner, AGB.

It is a manual system that carries sashes weighing up to 150KG with ease, and copes with sash rebate sizes up to 1760mm wide and 2510mm high.

The handle is in the intuitive downward vertical position when the door is closed. For full opening the user has to rotate the handle through 90° to horizontal and then gently pull the door open and slide. The sash will move into the room by just 115mm so is very unobtrusive. To tilt the door for ventilation, the sash must be pushed into the closed position and then rotate the handle upwards to the vertical.

Galileo's perimeter hardware is taken from AGB's ArTech tilt and turn system. As such, the compression cams are telescopic mushroom cams so it is easy to upgrade the security level by replacing the standard compression strikers with mushroom strikers if desired.

This commonality of parts between ArTech and Galileo also means that users of both systems can hold reduced stocks of some items, such as corner drives, drive gears and striker plates.

The smooth action of AGB hardware means that a standard tilt & turn handle provides sufficient leverage to drive the perimeter gear. This means that the handle can be suited with other handles on the installation. For example, a greenteQ Alpha tilt & turn handle matches in style and colour to Alpha window and residential door handles.

AGB Galileo is available in white, brown and silver.

Benefits at a glance:

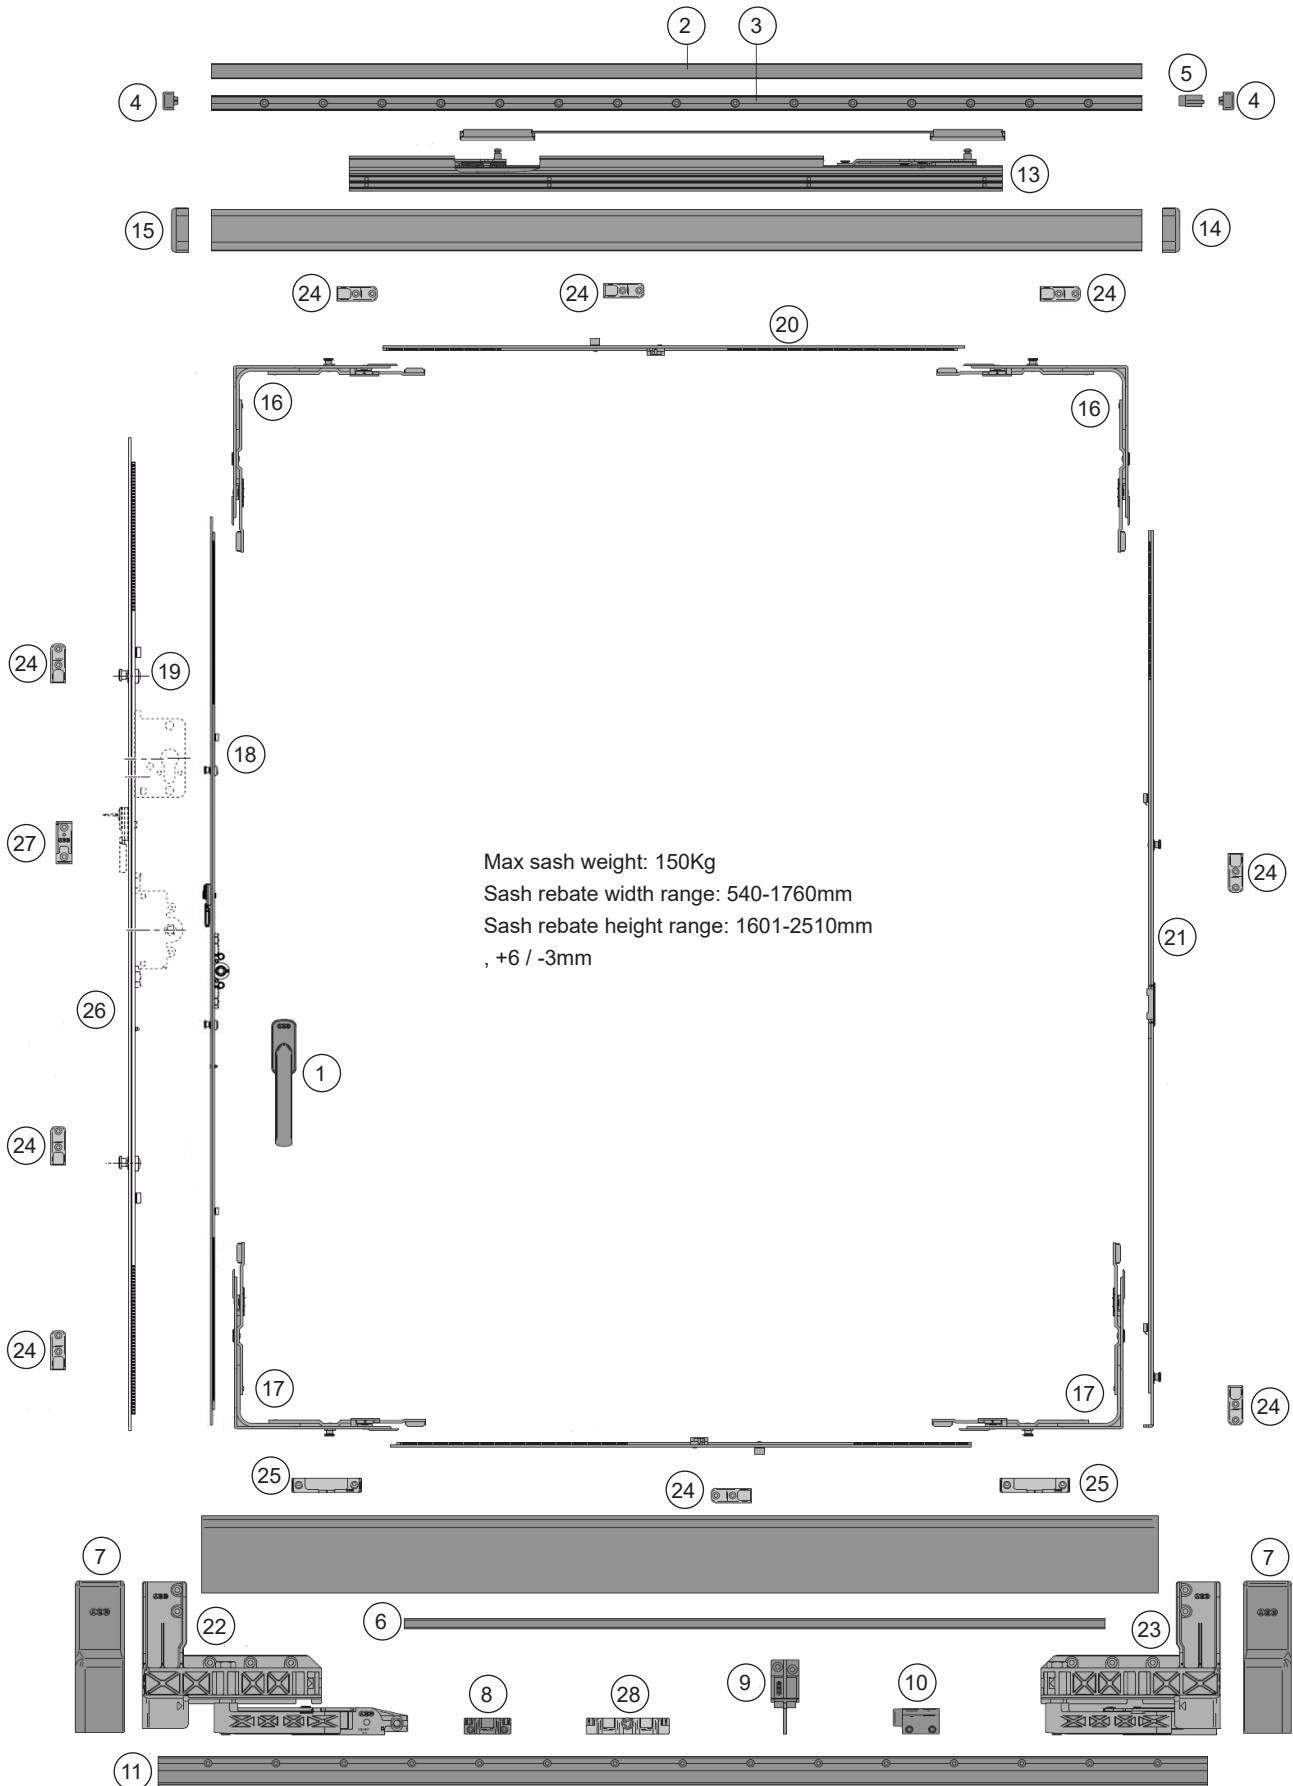

- AGB perimeter hardware is renowned for its very smooth operation
- Ability to use a tilt & turn handle enables a full house installation to be suited (i.e. greenteQ Alpha handles across tilt/slide, residential doors and windows)
- Carries 150KG sashes with larger than average maximum SRW and SRH sizes
- Steps into the room by just 115mm when in slide position
- Commonality of parts with TBT gear reduces the fabricator's stock holding
- Easy upgrade to mushroom striker plates
- Intuitive operation and handle positions
- +6/-3mm height adjustment
