## Yale Flush Sash Shootbolt Window Lock for French Casements

---

### Yale Flush Sash Shootbolt Window Lock for French Casements

---

Yale have now introduced a range of extensions to enable fabricators to fit the Yale Window Shootbolt to flush French Casement windows.

The new extensions work with either the existing standard or extended gearbox to provide 'crop' or 'non-crop' solutions.

Each extension features a dual-cam bracket adjacent to the shootbolt to provide a secondary night-vent position.

Because of the dual-cam bracket the extensions are handed, so a LH and RH are required for each active leaf.

See over for ordering details.

#### Benefits at a glance:

- Taps into the growing market for flush French Casement windows
- Corrosion resistance to EN1670:2007 Grade 4
- Tested to a minimum of 50,000 cycles operational lifespan
- Benefits from strong Yale branding
- Made in Britain
