Yale Superior Series Cylinder

Superior Series Kitemark Approved Profile Cylinder

The Superior Series from Yale becomes the latest TS007:2011 Kitemark approved profile cylinder available from VBH.

It is a premium quality product that features protection against practically all methods currently used by criminals to bypass a profile cylinder today; namely bumping, snapping & extraction, drilling and picking.

Superior Series is TS007:2011 Kitemark approved. Crucially, both ends are fully protected and both are clearly marked with the BSI Kitemark logo and a star. This marking denotes its status as a Kitemark 1-Star tested and approved product and acts as a visible deterrent to a would-be burglar. From a stock-holding perspective the fabricator only needs to stock one product, regardless of whether the cylinder is being fitted to an inward or outward opening door.

Each cylinder is supplied with 3 keys and a striking Yale branded plastic key code card to reinforce the message to the end-user that their door is fitted with a top quality product.

Benefits at a glance:

- **Anti-Bump:** Superior Series features 'V-Pins' to resist bumping
- **Anti-Snap:** The cylinder is fixed into the lock through a steel bar, significantly strengthening what is traditionally a weak point around the fixing screw
- **Anti-Drill:** Superior Series is protected against drilling by anti-drill pins and balls
- **Anti-Pick:** 4 special anti-pick pins on each end resist picking
- Sacrificial break points for double extraction protection
- TS007:2011 Kitemark approved with 1-Star classification (KM559658)
- EN1303 classification 16000C62
- Visual deterrent on cylinder ends
- Powerful Yale branding
- **Non-handed as cylinder is fully protected on both ends**
