greenteQ Delta Hinge Protector

greenteQ Delta Hinge Protector

greenteQ Delta Hinge Protectors provide excellent resistance to forced entry. With one half fitted in the friction stay groove on the sash and another fitted opposite on the frame (in both hinged corners), the components inter-lock if jemmying of the hinge side of a window is attempted. In normal use the 2 halves do not come into contact with each other so wear and tear is not an issue.

It is recommended that Hinge Protectors should be fitted to any window that is to be tested to PAS024, unless security friction stays have been fitted.

Our Hinge Protectors are produced from strong and durable stainless steel, and are supplied with a 10 year greenteQ guarantee.

Delta Hinge Protectors are approved for use on Q-secure PREMIUM PLUS installations, and are also approved by Secured by Design as a Police Preferred Specification.

| Size | VBH Code | Box Qty |
|-------------------|----------|---------|
