### greenteQ Alpha 25 Stainless Steel Door Handle

In response to requests from the market, a grade 304 stainless steel version of the popular Alpha door handle has been added to the greenteQ range.

Called the Alpha 25 in recognition of the 25 year guarantee, the handle's stainless steel construction backplates and levers are ideal for installations in coastal regions or other areas where corrosion protection is a major concern, as they achieve over 1000 hours neutral salt spray test results.

The handles are available in PVD gold, polished chrome, smokey chrome and brushed stainless steel and all feature the decorative groove that marks them out as a member of the greenteQ Suite.

Alpha 25 handles are available in long backplate unsprung lever/lever format so will fit most 92PZ locks. Spring cassettes are available as an optional extra if required.

#### Benefits at a glance:

- Grade 304 stainless steel construction for exceptional corrosion resistance
- Works with most 92PZ door locks
- Same door prep as standard long backplate Alpha handle
- Part of the greenteQ Suite
- 4 attractive finishes including new brushed stainless steel
- **25 year greenteQ guarantee**
