greenteQ Gamma Rim Latch Cylinder

greenteQ

greenteQ Gamma Rim Latch Cylinder

The Rim Latch Cylinder is the latest addition to the greenteQ Gamma range, joining the immensely popular Gamma Euro Profile Cylinder.

greenteQ Gamma Rim Latch Cylinders are compatible with most night latches that are used to open and lock traditional flush timber and composite front doors.

Night latches are usually originally supplied complete with a rim latch cylinder, but there is often a need to replace these due to product failure (some of the doors on which these are fitted are very old) or new people moving into a house and sensibly wishing to change the locks for security reasons.

Unlike many rim latch cylinders, the greenteQ Gamma product is supplied with 3 keys as standard, as opposed to the 2 keys that is commonplace. The cylinder itself has 6 pins, rather than the normal 5, making it more difficult to pick. This is an upgrade in the security level of most rival products.

Importantly, greenteQ Gamma Rim Latch Cylinders can be keyed alike to Gamma Profile Cylinders. This means that homeowners can use the same key throughout their home on their traditional timber or composite front door, and on any other entrances fitted with profile cylinders, such as their rear door, French doors and patios. Gamma Rim Latch Cylinders are available in nickel and brass finishes. They are sold and boxed individually within a carton of 10, complete with fixings, fixing plate and decorative surround.

VBH order codes can be found overleaf.

Benefits at a glance:

- Can be keyed alike with Gamma profile cylinders to provide a 'whole house suite'
- 6 pins for improved security
- Supplied with 3 greenteQ 'Q' branded keys
- Compatible with most readily available night latches
- Available in attractive nickel and brass finishes with subtle 'Q' branding
- Open profile means keys can be purchased and cut at high street heel bars
- Covered by the 10 year greenteQ guarantee
