

PRODUCT BULLETIN

greenteQ Sigma Composite Butt Hinge

Butt Hinge for Composite & Flush Timber Doors

The Sigma Composite Butt Hinge is ideal for flush timber and composite residential doors.

The hinge is part of the greenteQ Suite, where all products are perfectly colour matched and feature design constants across the range. The frame bearing features the subtle decorative groove that carries over onto greenteQ Alpha door handles, Omega letterboxes, Kappa knockers and, indeed, the Sigma flag and Hybrid door hinges.

Sigma Composite Butt enables manufacturers and installers of composite and flush timber doors to fit quality suited furniture across their products.

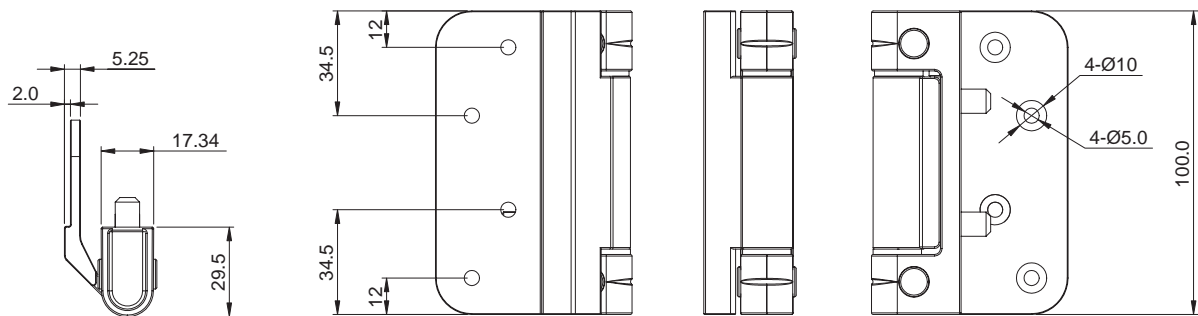

Not only does the hinge look stylish but it is practical, too. The maximum sash weight for a door fitted with three hinges is 100KG, and installers will find the ample 3D adjustment to be a real help on site. All adjustment can be carried out without the need to remove the door leaf.

Benefits at a glance:

- Part of the popular greenteQ Suite of matching window and door furniture
- Subtle decorative groove enhances appearance of door
- Ample 3D adjustment (+/- 1.5mm lateral, +4mm height, +/- 0.5mm compression)
- All adjustment is carried out without need to remove door leaf
- Covered by the greenteQ 10 Year guarantee
