greenteQ Alpha Door Handle Grip Protector

In response to requests from the industry we have introduced a Handle Grip Protector for the greenteQ Alpha door handle.

The flexible thermoplastic rubber protector simply fits over the lever to protect it from accidental damage during transport and installation. The soft, yet tough material protects against scratching and other impact damage.

The protector is quick to fit and remove so saves time on site as it replaces the job of carefully cutting away bubble wrap, tape or other protective materials. As it leaves no residue, there is no need to clean the handle.

The protector is very easy to remove without damaging it, so it can be re-used time after time.

The VBH order code is shown opposite:

VBH Code	Description	Box Quantity*
2QHB0221	Alpha Handle Grip Protector	400

*Due to the nature and the low cost of the product, Handle Grip Protectors should only be sold in box quantities.
