## greenteQ Sigma Aluminium Butt Hinge

### greenteQ Sigma Aluminium Butt Hinge

The Sigma Butt Hinge is a self-contained hinge for aluminium residential doors

The hinge is supplied ready to fit in one piece, as opposed to being a lift-off hinge or requiring a hinge pin to be inserted to attach the sash component.

The hinge will self-locate onto the profile without the need of a fitting jig.

Designed for use on lightweight doors weighing up to 90KG (using three hinges), Sigma Aluminium is available in four finishes of the greenteQ Suite to match or complement most popular aluminium door finishes.

The greenteQ Suite is a wide range of residential door, patio door and window furniture that is available in matching colours and styling. It perfectly ties in a full house installation across all these products. The hinge is covered by the greenteQ 20 year surface guarantee in all colours.

#### Main Features:

- Self contained hinge (not lift-off)
- Supplied ready to fit
- Self-locates onto door profile without jigs
- Part of the greenteQ Suite
- 20 Year greenteQ surface guarantee
